

**Designer Giuseppe Bavuso, year 2022**

The new Toledo coffee tables embellish spaces with their unmistakable material presence. The structure is in solid painted ash or Italian walnut. The model is characterised by a double support surface: the upper one proposed in marble, 5 mm. thick ceramic coupled with extra clear transparent glass or in glossy or matt lacquered MDF; while the lower one, which is also the base of the coffee table, can be in glossy or matt lacquered MDF. The wide range of finishes in the catalogue means being able to customise your model to create tone-on-tone combinations or colour contrasts.

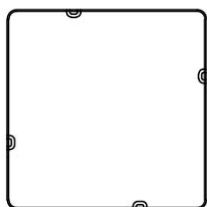

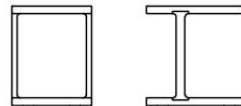

## **Toledo**

Frame in painted solid ash or in solid Italian walnut. Upper top in marble, in ceramic 5 mm. thick coupled with extra clear transparent glass or in matt or glossy lacquered MDF, lower top in matt or glossy lacquered MDF. Satin (matt) marble on demand.
